

Magnetic filter grids of hard ferrite or NdFeB

Magnetic filter grille made of HF, funnel shape 60°, stainless steel housing made of 1.4301

Article number	L mm	B mm	H mm	Temperature °C	Number of magnetic filter bars
MS130HFS00rh00	130	145	75	80	5
MS175HFS00rh00	175	180	75	80	7

APPLICATION:

Easily remove ferrous chips and particles - whether due to contamination or abrasion. The smooth stainless steel housing makes it easy to clean the magnetic filter. Our low-wear filters work reliably, increase the service life of your system and minimise maintenance and cleaning costs.

PRODUCT INFORMATION:

Our filter systems are designed as standard for the filtration of dry materials such as wood, plastic or recycled material.

No stock items, customised production

As an alternative to the standard version, we also offer customised solutions:

- " Tightly welded design for use in liquids (e.g. water, coolants)
- " High-quality stainless steel casing for use in food production
- " Increase in maximum operating temperature up to 350°C possible
- " Production of customised, non-standard sizes
