

Magnetic filter grids of hard ferrite or NdFeB

Magnetic filter grille made of NdFeB, funnel shape 60°, stainless steel housing made of 1.4301

Article number	L mm	B mm	H mm	Temperature °C	Number of magnetic filter bars
MS130NdSo00rh00	130	145	75	80	5
MS175NdSo00rh00	175	180	75	80	7

APPLICATION:

Easily remove iron particles and chips - whether caused by abrasion or contamination. The smooth stainless steel cover makes cleaning easy. Our reliable, low-wear magnetic filter grids extend the service life of your system and minimise maintenance and cleaning work. This variant of our magnetic filter is arranged in a practical funnel shape.

PRODUCT NOTE:

Please note that the standard version is only suitable for dry environments.

No stock items, made to order

As an alternative to the standard version, we also offer customised solutions:

- " Tightly welded version for use in liquids (e.g. water, coolant)
- " High-quality stainless steel cover for use in food production
- " Increase in max. operating temperature up to 350°C possible
- " Production of customised, non-standardised sizes
