

## Magnetic filter grids of hard ferrite or NdFeB

**Magnetic filter grille made of NdFeB, round, stainless steel housing made of 1.4301, suitable for pipe systems, welded design**

Article number	D mm	H mm	Temperature °C	Number of magnetic filter bars	Diameter magnetic filter bars
MS100NdSo00rh00	100	40	80	2	25
MS150NdSo00rh00	150	40	80	3	25
MS200NdSo00rh00	200	40	80	4	25
MS250NdSo00rh00	250	40	80	5	25
MS300NdSo00rh00	300	40	80	6	25
MS350NdSo00rh00	350	40	80	7	25
MS400NdSo00rh00	400	40	80	8	25

### APPLICATION:

Declare war on iron particles and swarf! Our magnetic filter system effectively removes these impurities from your material. The smooth stainless steel casing makes cleaning easy. The reliable, virtually wear-free technology ensures a long service life for your system and saves costs.

### PRODUCT NOTE:

The standard version of our filter systems is limited to use in dry environments. Typical applications include wood, plastics and recycling plants. This magnetic filter grid is manufactured in a round design.

No stock items, made to order

As an alternative to the standard version, we also offer customised solutions:

- " Tightly welded design for use in liquids (e.g. water, coolants)
- " High-quality stainless steel cover for use in food production

" Increase in maximum operating temperature up to 350°C possible

" Production of customised, non-standardised sizes
